

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (Currently Amended) An information processing system comprising: electronic equipment; ~~an information processing device;~~ and a server device,

the electronic equipment comprising:

~~a first address information storage section storing first address information showing an address with which the server device sends information to the information processing device;~~

~~a first electronic equipment identifier storage section storing a first electronic equipment identifier that is information with which the information processing device sends information to the electronic equipment;~~

~~a first address change confirmation information forming section for obtaining first address information from the first address information storage section, obtaining a first electronic equipment identifier from the first electronic equipment identifier storage section and forming first address change confirmation information containing the first address information and the first electronic equipment identifier, and~~

~~a first address change confirmation information sending section for sending the first address change confirmation information to the information processing device;~~

the information processing device comprising

~~a second address information storage section storing second address information showing an address with which the server device sends information to the information processing device;~~

~~a second electronic equipment identifier storage section storing a second electronic equipment identifier that is information with which the information processing device sends information to the electronic equipment;~~

~~a first address change confirmation information receiving section for receiving the first address change confirmation information;~~

~~a second address change confirmation information forming section for obtaining second address information from the second address information storage section, obtaining a second electronic equipment identifier from the second electronic equipment identifier storage section and forming second address change confirmation information by writing the second address information and the second electronic equipment identifier in the first address change confirmation information; and~~

~~a second address change confirmation information sending section for sending the second address change confirmation information to the server device~~  
an index information holding section holding index information that is information for obtaining an electronic equipment identifier; and

a send information sending section for obtaining index information from the index information holding section and sends send information containing the index information to the server device; and

the server device comprising

an electronic equipment address-related information storage section storing one or more pieces of electronic equipment ~~address information containing third address information and a third electronic equipment identifier~~related information,

~~a second address change confirmation information receiving section for receiving the second address change confirmation information;~~

~~a determination section for determining whether or not first address information and second address information, which are contained in the second address change confirmation information, agree with each other or/and whether or not a first electronic equipment identifier and a second electronic equipment identifier, which are contained in the second address change confirmation information, agree with each other, and~~

~~an electronic equipment address information updating section for rewriting third address information or/and a third electronic equipment identifier of electronic equipment address information containing third address information agreeing with the first address information contained in the second address change confirmation information and a third electronic equipment identifier agreeing with the first electronic equipment identifier contained in the second address change confirmation information into second address information or/and a second electronic equipment identifier contained in the second address change confirmation information when the determination section determines that the first address information and the second address information do not agree with each other or that the first electronic equipment identifier and the second electronic equipment identifier do not agree with each other~~  
an electronic equipment identifier index correspondence management section for storing an electronic equipment identifier corresponded to the index information;

a send information receiving section for receiving the send information from the electronic equipment; and

an information accessing section for obtaining the electronic equipment identifier based on the index information contained in the send information received by the send information receiving section.

2. - 34. (Cancelled)

35. (New) The information processing system according to claim 1, wherein

the information accessing section obtains an electronic equipment identifier based on index information contained in send information received by the send information receiving section, and accesses the electronic equipment related information based on the electronic equipment identifier.

36. (New) A server device comprising:

an electronic equipment related information storage section storing one or more pieces of electronic equipment related information;

an electronic equipment identifier index correspondence management section for storing an electronic equipment identifier corresponded to the index information;

a send information receiving section for receiving the send information from the electronic equipment; and

an information accessing section for obtaining the electronic equipment identifier based on the index information contained in the send information received by the send information receiving section.

37. (New) The server device according to claim 3, wherein the information accessing section obtains an electronic equipment identifier based on index information contained in send information received by the send information receiving section, and accesses the electronic equipment related information based on the electronic equipment identifier.

38. (New) An electronic equipment to configure the information processing system according to claim 1.

39. (New) An information processing method comprising:

a send information receiving step of receiving send information from an electronic equipment; and

and information accessing step of obtaining an electronic equipment identifier based on index information contained in send information received at the send information receiving step.

40. (New) The information processing method according to claim 6, wherein

at the information accessing step,

an electronic equipment identifier is obtained on the basis of index information contained in send information received at the send information receiving step, and electronic equipment related information is accessed on the basis of the electronic equipment identifier.
